Experience

Accuris | Senior Software Engineer

September 2026– Present | [Denver, CO](#)

- Work for the team Bridgeworks on their Connector software.

Accuris | Senior Agile Delivery Manager

November 2025– September 2026 | [Denver, CO](#)

- Ran and oversaw 6 different software teams to plan quarterly deliveries and worked with cross functional projects to make sure they were on time and had high value.

Convey | Technical Project Manager

April 2025– November 2025 | [Denver, CO](#)

- Managed concurrent, high-priority projects for enterprise clients including Exelon and FortisAlberta, delivering customized solutions on time and to specification. Drove client engagement from problem definition through solution design and successful implementation.

Returned.com | Engineering Manager & Technical Project Manager

April 2024 – March 2025 | [Boulder, CO](#)

- Lead internal and outsourced development teams to launch apps. Worked closely with CPO, CTO, and CEO to **define product roadmaps, scope projects, and optimize workflows**. Served as **Release Manager**, overseeing deployments 1–3 times per week in a fast-paced, evolving environment. **Acted as Technical Lead & Product Owner**, managing ticketing, sprint planning, and backlog prioritization. **Directly managed** a team of developers, including 3 outsourced engineers. *Role Eliminated due to company going under*

S&P Global | Scrum Master & Technical Project Manager

July 2022 – November 2023 | [Boulder, CO](#)

- **Led three software teams**, ensuring successful delivery by coordinating stakeholder communication, **sprint management**, and **risk management**. **Managed multiple cross-functional projects** and coordinated release schedules. Championed team well-being by identifying and mitigating burnout risks, increasing efficiency and morale. *Role eliminated due to company restructuring*

Lockheed Martin Space | Software Engineer & Project Manager

May 2018 – August 2021 | [Deer Creek, CO](#)

- **Software Engineering Intern (2018–2019)**: Developed immersive AR/VR applications to engage corporate partners. Built a satellite tracker leveraging AI & machine learning integrated with Unity.
- **Software Tech 1 (2019–2021)**: Led Nebula intern team, managing the development of an AR rover prototype for lunar missions. Took on project management responsibilities, working closely with stakeholders.
