Experience

Lockheed Martin Space, Deer Creek, CO - *Software Engineering, Program Management*

May 2016 - May 2022

- ❖ **2016 - 2018** : Software Engineering Intern working with the Pulsar AR, VR team to create immersive programs to intrigue corporate partners. Worked on the software team that developed and launched Lockheed Martin's F35 Pilot HUD Visors.
- ❖ **2018 - 2022** : Senior Software Engineer and Program Manager working with the Nebula AR, VR team overseeing the production of the AR pilot helmets creating the HUD. Also worked as a college intern hiring manager and interviewed over 200 prospects.

Microsoft, Redmond, WA - *Principal Software Engineer, Technical Project Manager*

August 2022 - August 2024

- ❖ Working as the Forest Biome and Warm Oceans Principal Software Engineer with Mojang Studios to create new updates and features for Minecraft. In 2023, headed and created the Cherry Blossom Biome in the 1.20 Release, currently working as the technical lead on Minecraft Java.

August 2024- Present

- ❖ Xbox Senior Principal Engineer working on Forza Far Horizons and Minecraft Java Edition leading 8 software teams as an architectural engineer and mentor specializing in Fluid Dynamics and computational complexities.

Skills (10+ years)

- ❖ **Simulation & Physics** — Real-Time Fluid Dynamics (SPH, FLIP/PIC, Eulerian Grid Solvers), Navier-Stokes Approximation, Vorticity Confinement, Buoyancy, Surface Tension, Numerical Stability & Solver Convergence, GPU Compute (CUDA, Compute Shaders, HLSL/GLSL), 3D Vector Algorithms, Spatial Partitioning, Computational Complexity
- ❖ **Engine & Systems Architecture** — Custom Game Engines, Unity (DOTS/ECS, Burst, Job System), Xbox Engine, Rendering Pipeline Architecture, Multithreading, Data-Oriented Design, Memory Management & Profiling, Cross-Platform Abstraction Layers
- ❖ **Platforms & Infrastructure** — Xbox (GDK), Android Studio, Apple Development, Docker, K8s, CI/CD for Build & Asset Pipelines

- ❖ **Technical Leadership** — Architecture Review & Technical Direction, Mentorship, Cross-Discipline Roadmapping, Agile Methodologies, Scrum Master, Waterfall, Jira, Confluence

Notable Projects

Unity Reborn

- ❖ For over 4 years, I have been working on a personal project called Unity Reborn. This game is written in Python, Java, C++, C#, and HTML. It is released on Steam with proceeds supporting the Make a Wish foundation.

Omori

- ❖ Worked on this game from age 14- present as a lead developer and producer. Top 50 selling games on Steam across multiple different platforms.

Awards

- ❖ **Microsoft Engineer of the Year 2025** - Selected out of 580 Engineers.
- ❖ **Xbox Engineer of the Year 2025** - Selected out of 80 Engineers.
- ❖ **Mojang Principal of the Year 2024** - Selected out of 10 Engineers.
- ❖ **Lockheed Martin Most Powerful Rising Woman in Computer Engineering and Software Innovation 2018 and 2019** - Selected out of over 200 nominated peers.
- ❖ **FBLA State Champion 2019** - Placed 1st in Computer Game and Simulation Programming out of over 30 teams.

Education

University of Colorado at Boulder, CO - Computer Science, Mandarin Chinese, Physics, Applied Math

- ❖ **GPA:** 3.4
- ❖ **Area of Interest:** Neural Networks, ML, AI, AR, VR, Video Game Design, Computational Complexity, Automated Systems

Languages

- ❖ **English** - Native Language
- ❖ **Mandarin Chinese** - Native Language
- ❖ **Korean** - Advanced Proficiency
